1. This Office action is in response to the interview with Morland Fischer on July 17, 2005.

The proposed amendment has been incorporated in this Examiner's amendment. Claim 1 has been amended to include the limitations previously found in claim 10.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Please cancel claims 11-15 and 17-23.

1. (Currently Amended) A system for monitoring a gas/oil well, comprising:

a monitoring unit at a well head, the monitoring unit including a wireless monitor transceiver consuming power at a safe level for avoiding an explosion risk and further including a gas tight box for housing sensor processing electronics, said wireless monitor transceiver located outside of said gas tight box;

a relay unit including a wireless relay transceiver communicating with the wireless monitor transceiver of the monitoring unit and further including a telephone communication link; and

a host interface communicating with the relay unit through the telephone communication link.

3. Claims 1-7 and 24-27 are allowed.

4. The following is an examiner's statement of reasons for allowance: Claim 1 recites a monitoring system with a relay wherein the monitoring unit consumes power at a level below an

explosion risk so that the wireless transceiver is located outside a gas tight box. The prior art teaches the use of a gas tight box to enclose all of the electronics and thus does not teach or suggest the use of limited power. The other claims recites systems and methods of communicating via a relay in an explosive environment by using a transceiver located in an explosive environment using a first power level and a relay outside the explosive environment using power at a higher level. Such a combination is not taught or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Albert K. Wong whose telephone number is 571-272-3057. The examiner can normally be reached on M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Horabik can be reached on 571-272-3068. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
